

Proutist Universal

VISION, MISSION & GOAL

● Vision

An integrated socio-economic system that enables both people and planet to thrive. An alternative to corporate capitalism, the current dominant economic model. While capitalism is focused on the maximization of profits to benefit a few, Prout's economy seeks to build wealth for everyone.

● Mission

Proutist Universal (PU) is a global network of activists and thinkers inspired by the integral vision and approach of the Progressive Utilization Theory. PU publishes, presents, and networks to share those ideas and engages locally to put PROUT's guiding principles and values into practice.

● Goal

To become known worldwide as the alternative to Capitalism and Communism.

AN INTERNATIONAL TEAM

Advisory Committee

The Advisory Committee (AC) provides strategic guidance in PU and is responsible for financial and legal oversight. It is ultimately responsible for the strategic direction PU and its branches and various organizations take, providing recommendations to its affiliates, partners and contributors. This board will also approve budget requests as well as new affiliation applications and decide where to establish or recognize new branches.

Working Board

Is responsible for the daily running of Proutist Universal and to implement the strategic decisions of the AC. They, with the help of the Administration & Finance department, will give practical support to the partners wherever they can, supervising, providing guidance and materials as necessary and possible. They will receive the partner's reports and evaluate how the work is going in each area, and inform the AC.

Activities

Departments

- Public Relations, Networking and Events
- Education & Training, Research and Publications
- Projects, Federations and Movements
- Administration and Finance
